

ENVIRONMENTAL AND CLIMATE-FRIENDLY ENERGY POLICY OF JSC OLAINFARM

JSC Olainfarm produces reliable and effective top quality medicines and products of fine chemical synthesis worldwide. We aim to build a fair, responsible and constructive cooperation with our employees, patients, partners and the community in which we live and work. JSC Olainfarm has introduced the standards of Good Manufacturing Practice (*GMP*), Good Distribution Practice (*GDP*) and an Environmental Management System according to ISO 14001:2004 as part of our enterprise management system to achieve our goals.

- ❖ We are planning to expand the Environmental Management System with the energy evaluation activities in order to increase the company's efficiency and competitiveness.
- ❖ We are committed to deliver sustainable, competitive and energy-efficient business operations and development of the technology in line with the laws and regulations of the environmental and energy sectors and other regulatory requirements applicable to us.
- ❖ We are protecting the environment and natural resources by reducing and preventing pollution of the environment to create a favorable and safe working environment and living conditions for our employees and the public.
- ❖ We are promoting procurement of efficient, cost-effective, environmentally friendly services and energy resources, as well as balanced use of energy resources to reduce carbon dioxide emissions.
- ❖ We are committed to ensure that the environmental and energy policy as well as environmental information is available to our employees, partners, customers and other stakeholders.
- ❖ We aim to involve our employees in the action of the environmental and energy management systems by raising awareness and providing training to employees.
- ❖ We are using a systematic approach to environmental and energy management because our manufacturing process entails the use of complex raw materials and energy flows; this poses a challenge to reduce energy costs and pollution.
- ❖ We are confident that the continuous implementation of the Environmental and Energy Management System and the regular improvement of the objectives will decrease the manufacturing costs in our company.
